SUMMARY

Penultimate-year postgraduate with hands-on experience delivering AI-powered business systems and data-driven automation solutions across engineering and operations environments. Proven track record building intelligent workflows, CRM automation pipelines, and agentic AI systems using LLMs, n8n, and vector databases. Motivated to apply technical depth in machine learning, prompt engineering, and process automation to solve real operational challenges at scale.

CORE COMPETENCIES

Data & Automation:	Python, Java, SQL, RAG (LangGraph), Qdrant Vector DB, MCP Server, n8n, Hugging Face, Selenium, Postman, API Testing, Machine Learning, REST APIs, Temporal, Anthropic AI, AppSheet, AppScript Automation
Agile & IT Delivery:	Agile/Scrum, User Stories, Requirements Gathering, Sprint Coordination, JIRA, Workflow Optimisation
Analytics & Commercial:	Excel (Advanced), Power BI, KPI Tracking, Sales Pipeline Management, Performance Reporting, Dataset Analysis
Communication:	Client Presentations, Stakeholder Communication, Proposal Writing, Cross-functional Collaboration, Hiring Support

PROFESSIONAL EXPERIENCE

Product Development Engineer **Sep 2026 – Present**

Royal Enfield, Leicester, United Kingdom

- Building internal business applications on AppSheet with Google Apps Script, moving teams off spreadsheet-based tracking and onto structured, multi-user apps.
- Delivered the most complex automation tasks within my first month and demonstrated them live to end users.
- Built automated email notifications that alert the right people when a task is completed, with action tracking so owners can see what has been picked up, by whom, and what is still pending.
- Identified process gaps independently and built working solutions without a formal brief, then released iterative upgrades as the apps matured.

AI/ML Intern **Apr 2026 – Present**

London Success Academy, London, United Kingdom

- Conducting end-to-end exploratory data analysis on real-world datasets, applying variance analysis, outlier detection, and correlation modelling to extract actionable insights.
- Building predictive models and evaluating performance using cross-validation, precision-recall analysis, and confusion matrix interpretation across classification and regression problems.
- Researching and critically analysing real-world AI system failures, bias in training data, and ethical implications of model deployment.
- Applying prompt engineering and LLM integration techniques to automate data workflows and prototype intelligent solutions.

Graduate Business Development Manager **May 2025 – Jan 2026**

EFA Engineering, London, United Kingdom

- Designed and developed an internal CRM reporting and automation tool, improving visibility of sales pipeline, client data, and project performance.
- Gathered business requirements from sales, operations, and leadership, translating them into functional reporting solutions for executive decision-making.
- Built automated Excel and Power BI dashboards, reducing manual reporting time by 70% and improving data accuracy.
- Presented system capabilities to stakeholders, supporting adoption of new internal tools with 95% user acceptance.
- Collaborated with cross-functional teams including directors and recruiters in a fast-paced consultancy environment.

Software Development Engineer in Test (SDET) **Feb 2023 – Mar 2024**

Nineleaps, Bengaluru, India

- Performed manual and automated testing for web and mobile applications across multiple releases in FinTech and enterprise software.
- Developed and executed test cases using Selenium with Java and Cypress for UI automation, improving coverage and pre-release defect detection.
- Conducted API testing using Postman, validating REST endpoints, payloads, and response codes for data integrity.
- Performed security testing using OWASP ZAP and GraphQL Cop, identifying vulnerabilities across REST and GraphQL APIs.
- Tracked defects using JIRA and collaborated with developers during Agile/Scrum sprint cycles.

KEY PROJECTS & INITIATIVES

AI RAG CV Builder **Ongoing**

Python, LangGraph, Qdrant Vector DB, Artificial Intelligence

- Built a Retrieval-Augmented Generation (RAG) system using Python and LangGraph to enable efficient access to internal business documents, bids, and reports, cutting manual document search effort by 60%.
- **I**mplemented a hybrid keyword-matching and semantic vector search layer on top of the existing pipeline to improve retrieval precision on domain-specific terminology.
- Designed a relevance scoring mechanism to rank and re-rank retrieved passages before they reach the generation step, improving answer grounding.
- Optimised the retrieval pipeline (chunking, indexing, and query routing) to reduce latency and improve information quality returned to the LLM.

AI-Powered Proposal Automation System (Agentic Pipeline) **In Development**

n8n, Claude AI, Qdrant Vector DB, MCP Server, Prompt Engineering

- Designing an end-to-end agentic workflow that takes a proposal from RFP intake through to a submission-ready draft, targeting a reduction of the typical 5 to 7 day manual proposal cycle.
- Built an automatic PII detection and data-masking stage so sensitive client information is protected before any data reaches the LLM.
- Integrated Claude via an MCP server with a Qdrant vector database so the agent drafts tailored proposals grounded in the client brief and company credentials.
- Implemented a compliance rulebook validation stage.
- Structured a human-in-the-loop approval step so reviewers focus on strategy, pricing, and client relationships rather than formatting and boilerplate.

CRM Automation & Business Intelligence Tool **2025**

Python, Excel, Power BI, Power Automate

- Designed and implemented an internal system to automate CRM data processing and reporting for a high-growth consultancy.
- Translated operational requirements into technical logic, enabling real-time dashboards for faster leadership decisions.
- Achieved adoption across the commercial department with 30+ active users and a 95% satisfaction rate.

EDUCATION

University of East London **May 2024 – Jan 2026**

MSc International Business Management, London, United Kingdom

Sri Krishna College of Technology **Aug 2019 – May 2023**

B.Tech Information Technology, Coimbatore, India

AWARDS, CERTIFICATIONS & INTERESTS

Moolya IT - Certified SDET | Moolya IT Service Company **2023**

Certified Azure AI Fundamentals | Microsoft **2025**

Software Engineering Job Simulation | JPMC **2026**

AWS Cloud/AI Practitioner | AWS **Ongoing**
